Our new team home site is live

After six weeks of work, the Contoso Digital Workplace team has a new home site that brings news, documents and requests together in one place. (Example content.)

The site uses audience targeting so each group sees what matters to them, and the dashboard shows open requests at a glance.

Thanks to everyone who tested the pages and sent feedback during the pilot.

ACTION FOR YOU: Bookmark the new home site and update your Teams tab by 23 October.
